

ACRYLIC SHOWER WALL SURROUND 3 PANEL KIT

SPECIFICATIONS

This 3 piece Wall Surround is custom cut to fit perfectly over existing walls in the wet area of the bathroom. It is manufactured using a sheet of co-extruded DR/ABS (Durable Rubber Acrylic/Acrylonitrile Butadiene Styrene). This sheet has a thickness of .3mm.

On the acrylic portion of the product, the DR is the top 15% of the sheet. It is pigmented a solid color, then modified for a high-impact surface. The ABS is the bottom 85% of the sheet. Like the DR, it is also pigmented. ABS is used because it is rigid, yet capable of flexibility.
